HTML, CSS, SASS, PHP, Javascript, jQuery, React, Angular 2, TypeScript, Jest, Git, Express.js, OOP and Function based programming, Node.js, APIs Functional testing, MongoDB, Rest, MySQL, PostgreSQL, Firebase, Figma, and more.

## Projects

- [LiteStep.com](#)

Litestep.com is my personal Blog and Portfolio website hosted on Heroku. It will become a full MERN web application in time. I plan to blog about the creation of the website, and the transition into a full stack web over time. Once complete, It will be transitioned into a much larger web application.

Git: <https://github.com/xclusive36/Blog>

- [SnipSnap](#)

SnipSnap is a simple group project. It is a Beauty Salon booking website, you can create an account, authenticate, view bookings, create your own bookings.

Git: <https://github.com/xclusive36/SnipSnap>

- [Meta Insight](#)

Meta-Insight is a simple group project. It is a social game review website, you can create an account, authenticate, view games, view reviews, submit your own reviews, and view a dashboard of all your current reviews.

Git: <https://github.com/erin-m-keller/meta-insight/>

- [MisfitGirl.com](#)

A Wordpress blog and e-commerce web store created for my wife to blog about and to sell Wax melts that she creates as a hobby project. It's a wonderful way for her to express her self and showcase to the world some of her talents.

- [Litestep iOS Application](#)

A pick list application for use as a way to track user inventory needs on the fly.

Git: <https://github.com/xclusive36/LiteStep>

- [Volunteer Finder](#)

A simple group project designed to showcase each of our talents utilizing various APIs including Google Firebase Authentication.

Git: <https://github.com/erin-m-keller/volunteer-finder>
